

# ADMIN APP

## DIRECTACCESS®, VIDEOWATCH® & EMERGENCY NOTIFICATION

### FEATURES

Datawatch Admin App houses multiple Datawatch applications and provides property managers with a centralized location for managing and accessing their Datawatch account on the go - Datawatch DirectAccess®, Hosted VideoWatch®, and Emergency Notification. This app allows administrators to easily navigate and control these programs from a single dashboard, reducing the need for multiple applications. In addition, it provides a convenient and streamlined way for administrators to monitor and manage their Datawatch infrastructure, which can help increase efficiency and productivity.

### DIRECTACCESS®

This app allows Datawatch DirectAccess® users to access their information in our secure database anywhere, anytime.

- **CARD ADMINISTRATION:** Add, edit, or delete cards on the go.
- **DOOR CONSOLE\*:** Lock and unlock doors from your smartphone.
- **PRE-REGISTER VISITORS:** Enter visitors information into your system days, weeks, or months in advance.
- **LOCKDOWN\*:** With the latest Datawatch Technology, lockdown the perimeter of your building with the touch of a button.
- **DASHBOARD:** Snapshot of account. Quick view of active devices, upcoming visitors, and holiday reminders.

### VIDEOWATCH®

Hosted VideoWatch Mobile is specially designed for Datawatch video management solutions, enabling users to monitor video anywhere, anytime.

- Cloud-based VideoWatch® provides a live view from any online device with 24/7 service.
- Secure cloud-based video storage.
- Monitor the health of cameras and video servers.
- Export and save encrypted video clips at anytime from anywhere.
- Smart cameras, HD quality and efficient search capabilities

### EMERGENCY NOTIFICATION SYSTEM

Emergency Notification System enables management to send information to their employees, tenants or vendors by property or specific groups. The system can send emails, text messages and attachments and receive feedback.

- **SEND COMMUNICATION:** Two-way communication with contact database. Streamlines delivery of time-sensitive information.
- **TRACKING:** Datawatch tracks all replies and keeps a list of who has not yet responded to each message.
- **CONVENIENT:** A flexible contingency plan that you can access and update in real-time.
- **EASILY:** Send messages at the touch of a button through the app, web portal, or have Datawatch's 24x7x365 staff do it for you.
- **SECURE:** Off-site, secure database and operators who contact employees via text message or email with your pre-planned information and client services representatives who will ensure your database stays up to date.
- **INTEGRATED SOLUTIONS:** System can be integrated with existing Datawatch Systems services.
